

Static Streamgraph

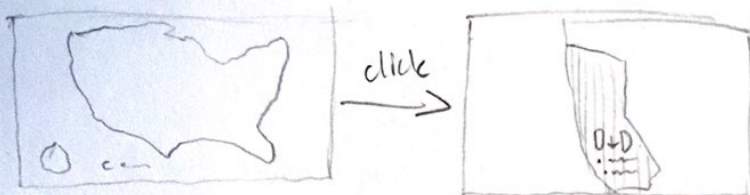

• alternatively, could map "while" to color.
Not sure what we'd do with "which" tho

Streamgraph transitions

• Probably more suitable for larger data sets

Just for shits + giggles:
"Zoom to Sounding box"

Putting text to the
state might be a
pain.

- different states
rep different "while"
values

= ☒ Dino
"which" ☐ Panda
"split" ☐ split

- If feeling fancy,
could add additional
info on click revealing
"at_desk" and/or "when"
trends of that particular
"while" value
